

Let us floor you!

All new, outstanding performance from Kolpak!

Era bracket technology solves floor delamination problems and provides a new level of foundation for walk-ins.

Its newly designed, patented Era bracket offers greater floor strength for foot traffic and rolling carts, approved for up to 1,000 lbs. per sq. ft. uniform load that is built to last and last and last.

Why? The new Era bracket eliminates the need for plywood underlay on foot traffic floors while enhancing its ability to handle light rolling cart traffic.

The improved design without plywood continues to meet NSF and DOE requirements. The new Kolpak Era bracket on structural floors with the addition of 3/16" overlay provides superior strength needed for keg coolers and other heavy rolling cart loads up to 5,000 lbs. per sq. ft. uniform load.

The Kolpak Era bracket provides the highest rated floor in the industry and provides a solid foundation for our customers for years to come.
